

# OCEAN ONE

Ocean One, which located in Shanghai, is a renovation project. It was originally a public space in a residential community and is now being converted into a showroom to cater to customers.

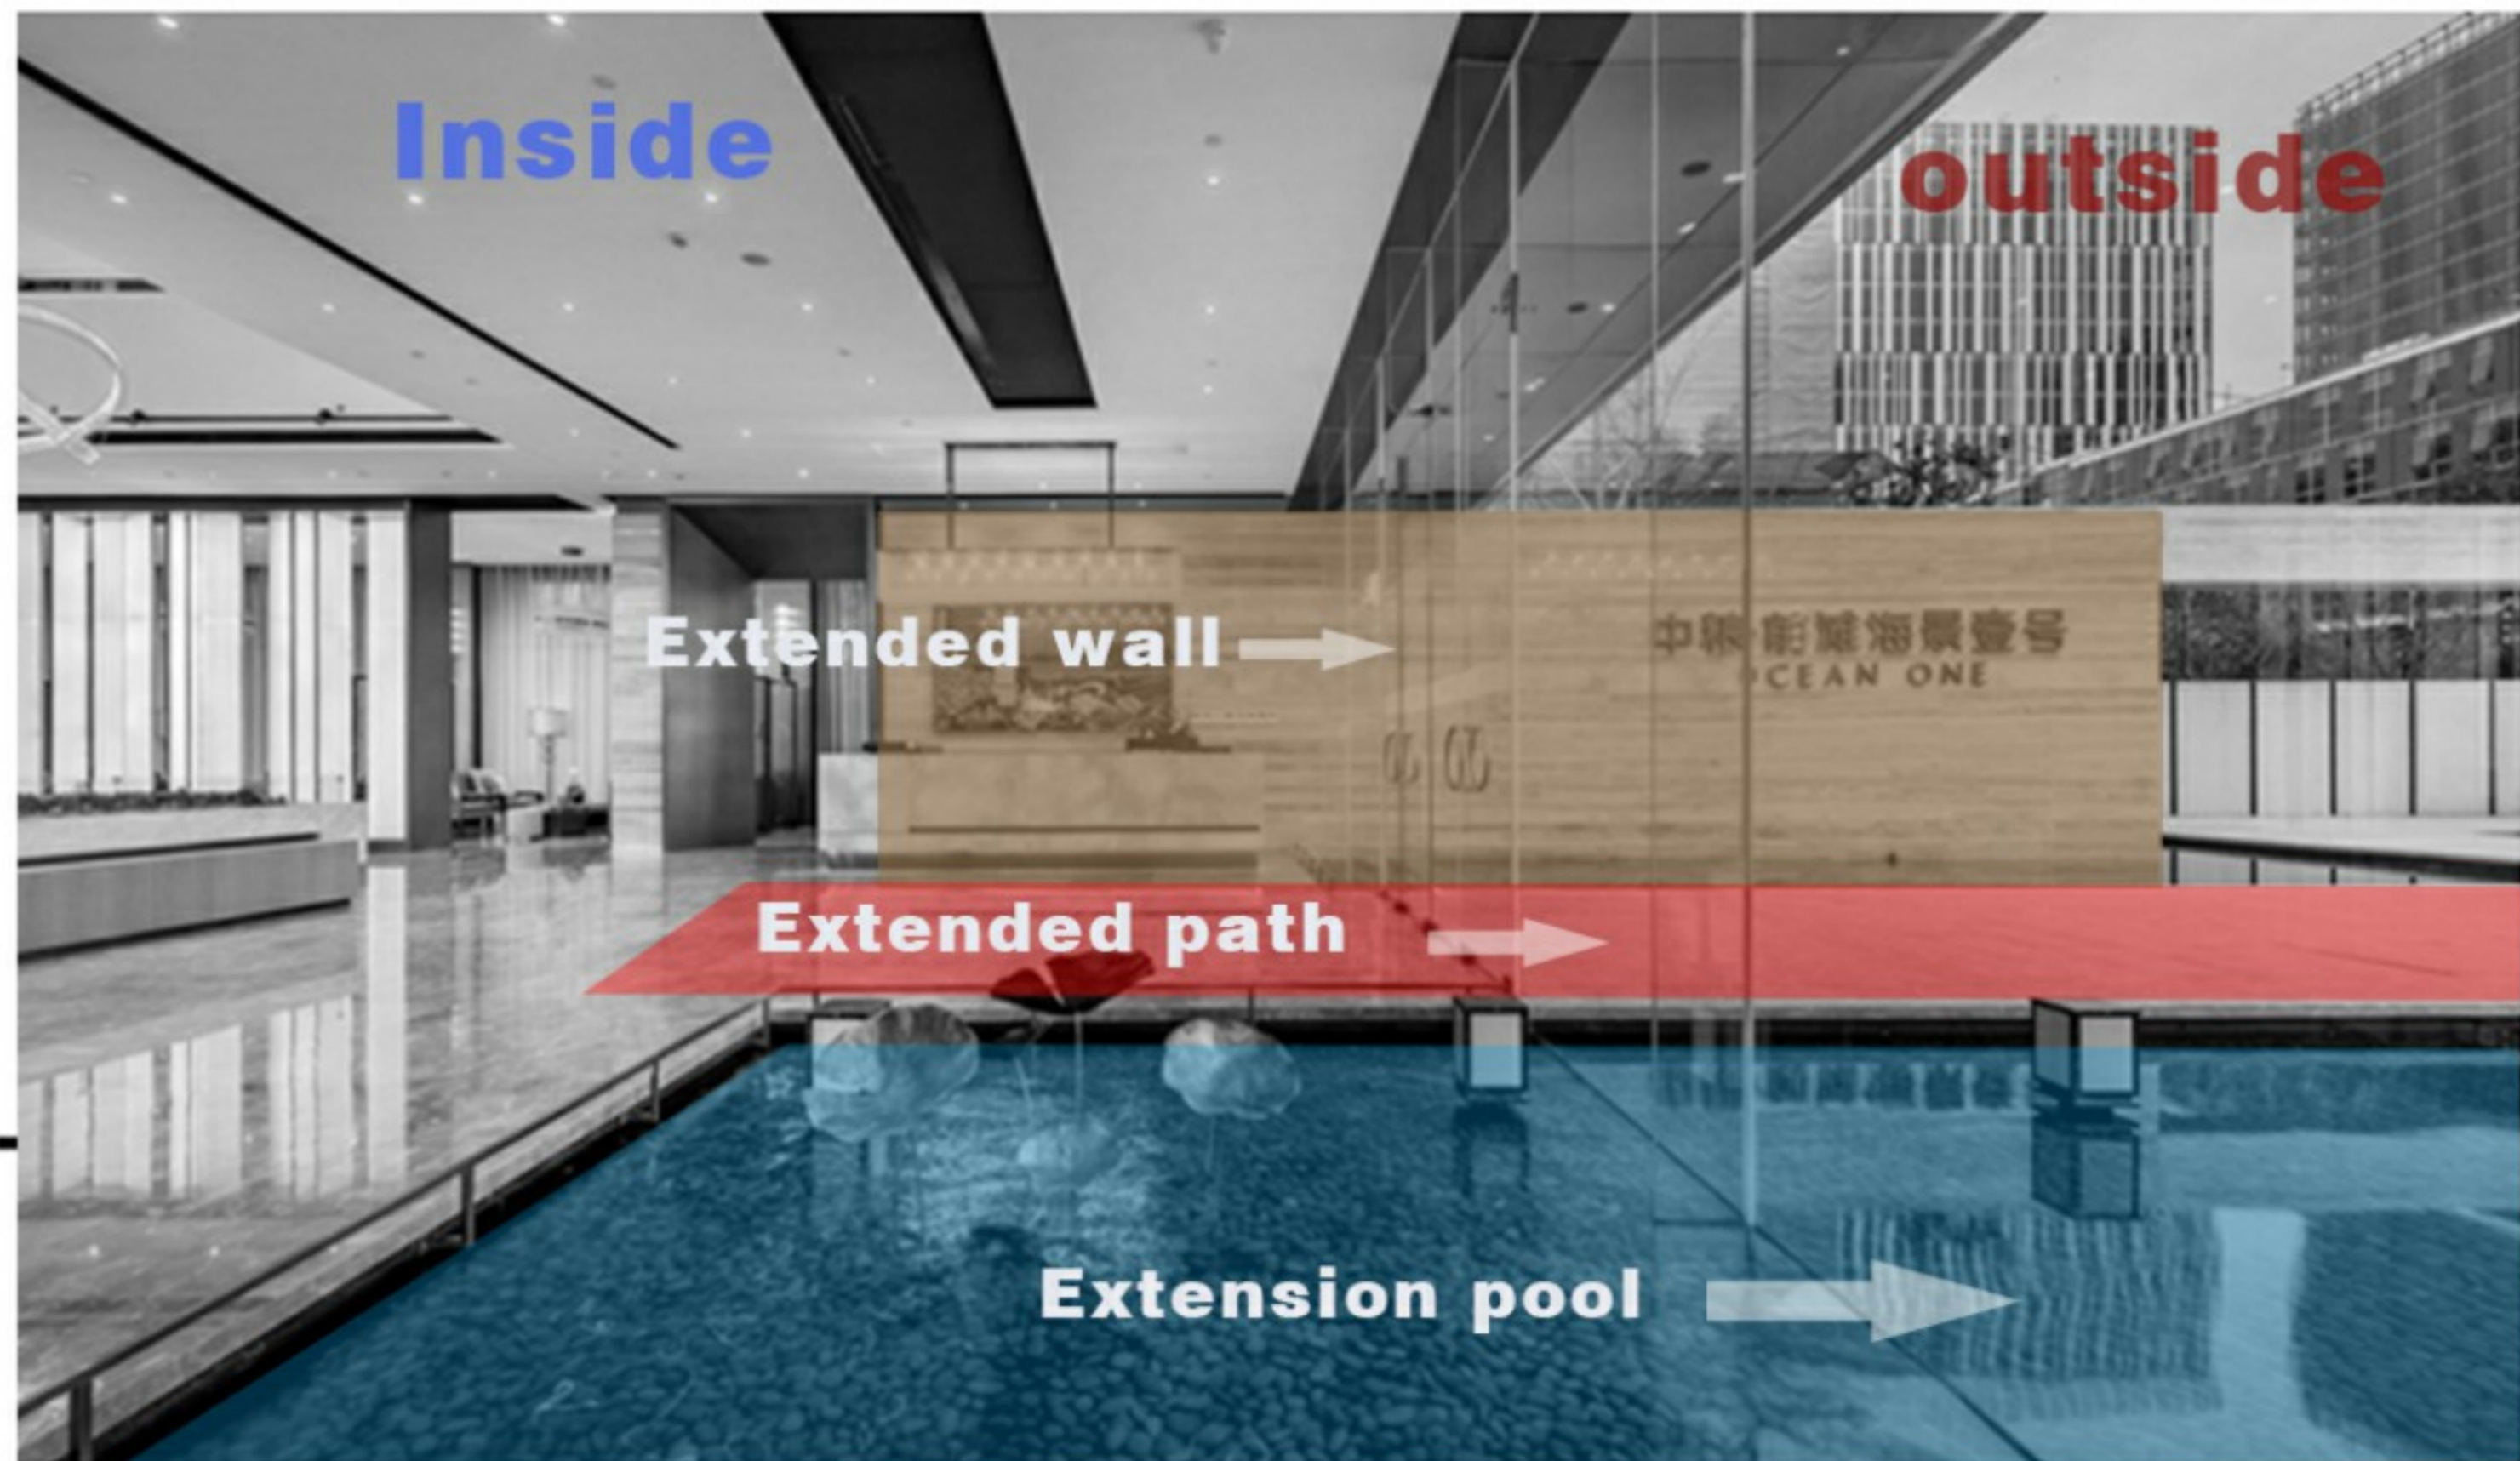

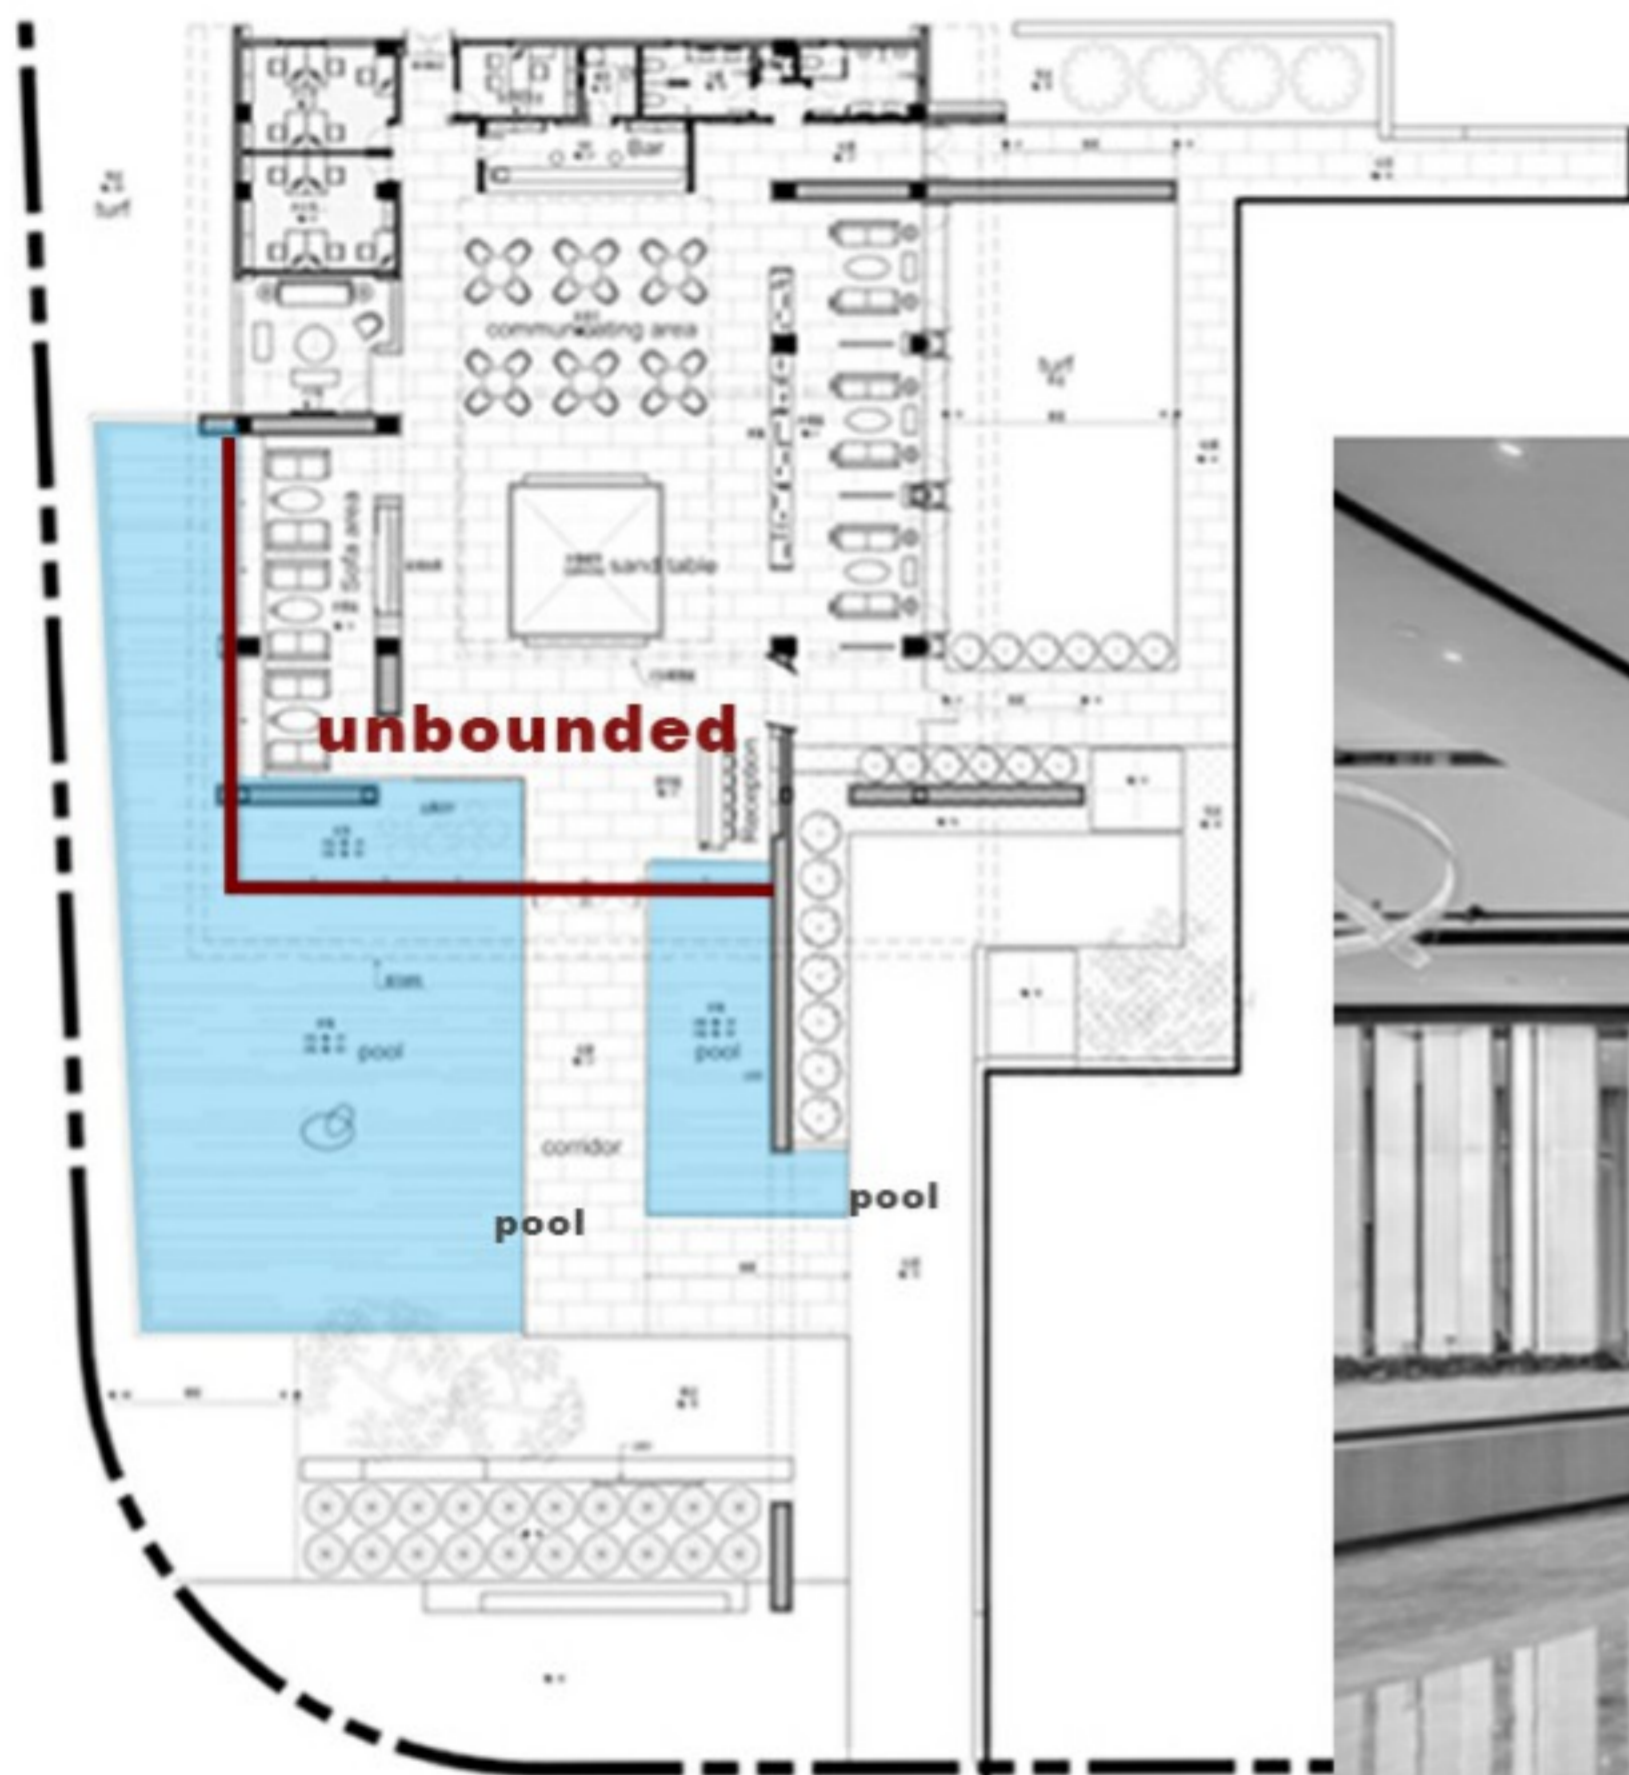

The designer retains the original structure and layer height, remakes the outer skin, pays attention to the integration of indoor and landscape in the design process, tries to integrate the building and interior space into the surrounding environment.

The residential area reception center of the project

# UNLIMITED BOUNDARY

Break the indoor and outdoor boundaries Technique: using glass as the main material of the exterior facade, visually break the boundary inside and outside; bring a clear visual experience to the person.

## 02 INFINITE VISION

Take indoor as the core, accomplish every space or corridor and natural union, let indoor and landscape union, stand in indoor each position can see natural scenery. Use of large area be born glass, maximize on the vision, the outdoor pool through the glass curtain wall to indoor, indoor bridge linking connection to the outdoor landscape, completed the cross and well versed in indoor and outdoor space landscape.
