

Start from Scratch—

Lian Chia-Hui's Visual Design Creative Solo Exhibition

The theme of this work is an individual visual design creative exhibition, and it signifies that in the course of learning, I "start from scratch," whether in the creative process, in the practice of design, as every design is the beginning of my creation, from the past to the present, from the present to the future. The designer's persistence in design and creation bring about the aesthetic connection of the designer and nurture the creative inspiration of the designer.
